DTS-SJ-982 - Single-sided Silicone Tape

Details:

- Due to its high temperature resistance and resistance to etching chemicals the single-sided Silicone Tape DTS-982 is e.g. used in the electronic and automotive industry
- It can also be used for splicing of siliconized papers, metal films, coated papers etc.

Symbol
DTS-SJ-982

CHARACTERISTICS	Unit	Minimum Value	Typical Value
Carrier: PETP film thickness	mm	0.023	±10%
Adhesive: silicone rubber			
Total thickness	mm	0.095	±10%
Peel adhesion on steel	N/cm	0.8	1.8
Rolling ball tack	cm		<10
Elongation at break	%	80	
Tensile strength	N/cm	35	
Breakdown voltage	kV	4.0	
Electrolitic corrosion	1		
Thermal class (°C)	130 (B)		
Short-term thermal resistance	180°C		
Test methods	AFERA, PSTC, IEC EN 60454-2
