

FP-8257 - Ventilation plugs

Details:

- **Body material:** PA 6 UL94V2
- **Membrane material:** Acrylic co-polymer on nylon support
- **O-Ring material:** NBR-EPDM
- **Protection:** IP68
- **Working temperature:** -20°C to 80°C
- **Metric thread as per DIN EN 50262**
- **On special order material PA 6 UL94 V-0 available**
- **Color:** RAL 7035 (light gray) lub RAL 9005 (jet black)
- These ventilation plugs are recommended in applications wherein it is required:
 - protection against water and dust
 - constant thermal balancing constant
- These plugs are intact permeable to gases and vapours but impermeable to liquids and dust.
- Even the smallest amount of water present in the air (water vapor) is blocked by the membrane (unless the differential pressure exceeds the intrusion pressure threshold).
