

## M-STRP - Screwed-in feet with knurled base

### Details:

- **Base material: Polyamide**
- **Stud material: galvanized steel**
- Load values have to be considered referring to static conditions calculated at the half of the screw length. In conditions of vibrations or in presence of dynamic loads these values should be reduced.

| Symbol           | Stud length<br>B | Base diameter<br>D | Metric thread<br>F | Base height<br>A | Height<br>H | Max. load<br>(static) |
|------------------|------------------|--------------------|--------------------|------------------|-------------|-----------------------|
|                  | [mm]             | [mm]               |                    | [mm]             | [mm]        | [N]                   |
